

Chat App, Audio, *Video Call App*

Zolo is a robust, secure, and feature-rich communication platform designed for private messaging, audio, and video calling. Tailored for enterprises and organizations that prioritize data privacy, Zolo stands out by hosting its database on-premise at the client's location, offering complete control over data security and privacy. This ensures that all communication data is managed within the confines of the organization's infrastructure, bypassing reliance on cloud-based solutions and preventing potential data breaches or unauthorized access.

ZOLO

Chat App, Audio, Video Call App with Own Database

We create a Tailor-Made Solutions That
Perfectly Fit Your Business Requirement

KEY FEATURES

- **Private Messaging:** Real-time, encrypted messaging with multimedia sharing and group chats.
- **Audio and Video Calls:** Secure, high-quality audio and video calls for individuals and groups.
- **On-Premise Database:** Data stored on the client's local server for complete privacy and control.
- **End-to-End Encryption:** Secure communications ensuring only intended recipients can access content.
- **Multimedia Sharing:** Secure file sharing with support for various formats.
- **Cross-Platform Support:** Available on iOS, Android, Windows, and macOS.
- **Customizable and Scalable:** Flexible to fit business needs, suitable for organizations of all sizes.

BENEFITS

- **Data Ownership:** Full control over communication data with on-premise storage.
- **Enhanced Security:** Maximum protection through end-to-end encryption and local data hosting. Protection for IP Tracking for server.
- **Cloud Independence:** Eliminates reliance on third-party cloud services, enhancing privacy.
- **Familiar User Experience:** Features similar to WhatsApp ensure ease of use and smooth adoption.
- **Tailored for Enterprises:** Designed for secure, private communications in sensitive industries.
